

## Durban IT Lab

### Project team

Carla Manion, Njapha Ntombifuthi, Kumarin Moodley and Donnie Govender.

### Project goal

To enhance 14 to 17 year olds' current learning by providing IT tools and connecting them with the global internet.

### Program

Vopak Terminal Durban is stepping up its partnership with the South African Domino Foundation to provide the Amaoti School in the local community with proper IT facilities. This will expose them to the world beyond their communities and increase their future career opportunities.

## Durban, South Africa

## Durban IT Lab

*Durban, South Africa*

### What has been realized so far

As the project team started the project, they encountered logistical challenges. They were forced to step back and re-evaluate the school's most critical needs and whether the original plan, building an IT Lab, is of best value for the school.

### Calendar

Instead of building the IT Lab the team will equip the current classrooms with carefully chosen IT equipment such as projectors, smart boards, computers, etc. Additionally they are looking into providing internet access and training for teachers.
